

# 🌸 Megan's Cause ~ Book Drive 🌸

*In Memory of Megan Elizabeth Evans who lost her life to Carbon Monoxide at Lake Powel in 2007 at the tender age of seven, her friends and family would like to honor her life by holding a book drive. Megan loved reading books, writing stories and creating adorable pictures to go along with her stories. Megan's birthday is February 16th and we encourage communities to donate a gently used or new children's book to Megan's Cause helping spread the awareness of the dangers of Carbon Monoxide. Each book will have a Megan's Cause label attached to the inside telling a little bit about Megan's story and directing people to her website... [www.meganscause.org](http://www.meganscause.org). We will then donate the books back to the community placing them in school libraries, family shelters and any other location in need. You can donate as many books as you would like and we will find them a good home.*

*Thank you for your support for Megan's Cause and the promotion of Carbon Monoxide awareness in our community. Your generosity is appreciated and we hope this book drive will help prevent future Carbon Monoxide accidents from happening around boats.*

*Books can be dropped off at with your coordinator during the week of February 14th through 18th. Location: \_\_\_\_\_*

*Contact: \_\_\_\_\_ for more information in your area.  
or call Krista Renning at (928) 607-0927*
